

Study Visit from Delft University of Technology, Netherland

July 18, 2013 A group of 32 graduate/undergraduate students and academic staffs at Delft University of Technology, Netherland visited Disaster Prevention Research Institute (DPRI) at Uji Campus. They made this visit to DPRI during their 3-week study trip in Japan and South Korea.

After a welcome speech from Professor Tatano, Vice-Director of DPRI, Professor James Mori, an earthquake seismologist at Earthquake Source Mechanisms Research Section in DPRI, gave a lecture titled “The 2011 Tohoku Earthquake and Tsunami: An Unexpected Disaster”. The lecture covered a wide range of topics such as basic seismology, summary about the 2011 Tohoku Earthquake and Tsunami and Japan’s Earthquake Early Warning System. Many questions were raised from the visitors and Professor Mori responded to each one of them.

Welcome message from Professor Tatano

Lecture by Professor Mori
