

Long-term Research Visits (Project No.: 2020L-02)

Project name: Assessment of Historical Seismological Records at Kyoto University and Steps Towards Digitization

Principal Investigator: Miyaki Ishii

Affiliation: Department of Earth and Planetary Sciences, Harvard University

Name of DPRI collaborative researcher: James Mori

Research period: February 1, 2021 ~ March 1, 2021 Funds for the visit to DPRI were transferred to 2021.

Research location: Uji, Kyoto

Number of participants in the collaborative research: 3 (DPRI staff: 2 , non-DPRI staff: 1)

- Number of graduate students: 1 (Master students: 0 , Doctor students: 1) (Included number)

- Participation role of graduate students [help with the inventory of old seismograms]

Implementation status in FY2020

Prof. Ishii planned to visit DPRI for several weeks to inventory and study the archive of old seismograms at Abuyama Observatory. Because of the Corona virus, she was not able to come to Japan.

Implementation plan in FY2021

If the health situation improves, Prof. Ishii hopes to visit DPRI in January 2022 for the planned visit to study the old seismograms archived at Abuyama Observatory.
